Because a faulty valve can't pump oxygen to the body as well, the patients who need this operation are typically grey in colour, low energy, out of breath. Literally within hours of the operation you can literally see the colour return to their cheeks, they can walk across the room. After heart surgery!

The background of the slide features a close-up of two faces, likely a man and a woman, with a semi-transparent blue overlay. The man's face is on the left, smiling, and the woman's face is on the right, with a more neutral expression. The text is overlaid on this image.

STORYTELLING

“”

Storytelling persists
because it is a framework
that guides the listener
through large amounts
of information.
